

FN3104W-B4

A wireless security system
so flexible to install

720P WiFi NVR Security System

• FN3104W-B4 DM

Mount it wherever you'd like

Enjoy all the advantages of wireless security system, such as flexible mounting positions, easier wiring works and less damages to your decoration. It can be put anywhere, especially for detached buildings with nearby power sources.

NVR and camera auto-pair, without your slightest effort

After being powered, four cameras will connect to the NVR in the same system automatically. No wiring among them is required at all for local viewing. Use Ethernet cable to connect NVR and router, and you'll get remote viewing access.

Tips: If it is necessary to replace the faulted camera in future, you need to connect the new camera (FI9800W) to NVR with Ethernet cable once first, and then they will be paired for automatic wireless connection.

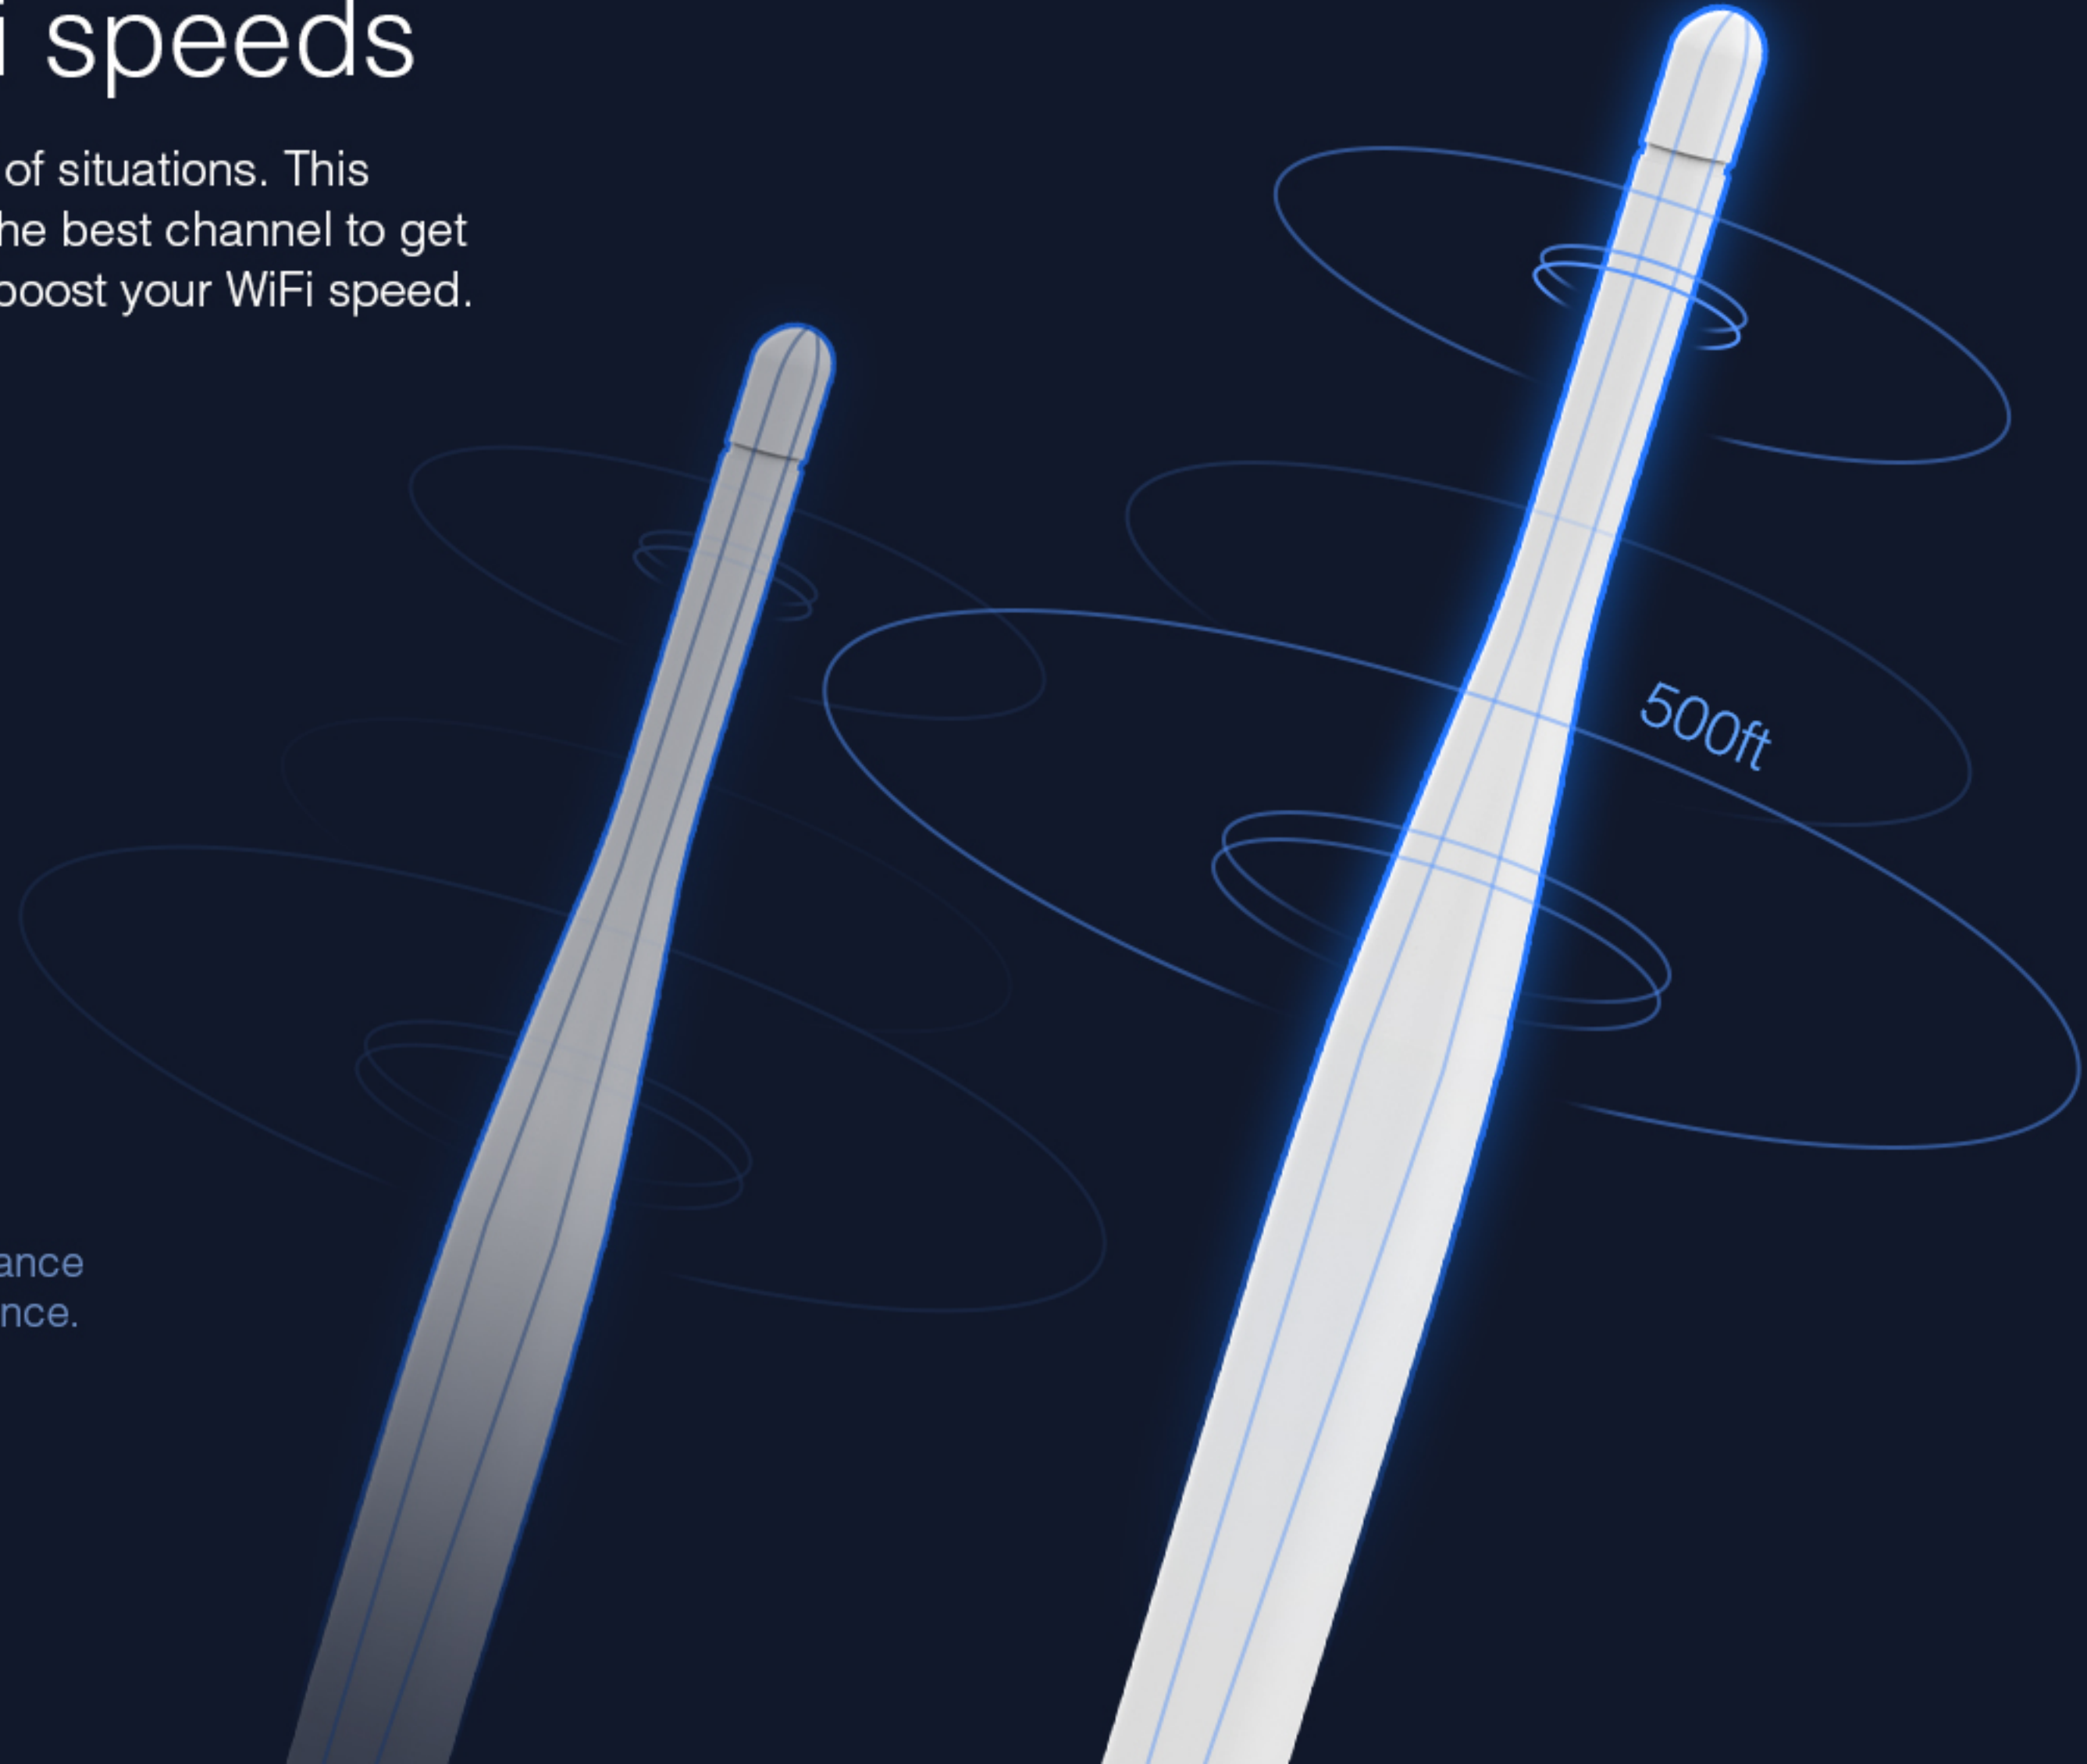

Automatic channel picking for sustained WiFi speeds

WiFi speeds are a vexing problem in a lot of situations. This security system can automatically select the best channel to get you more stable network connection and boost your WiFi speed.

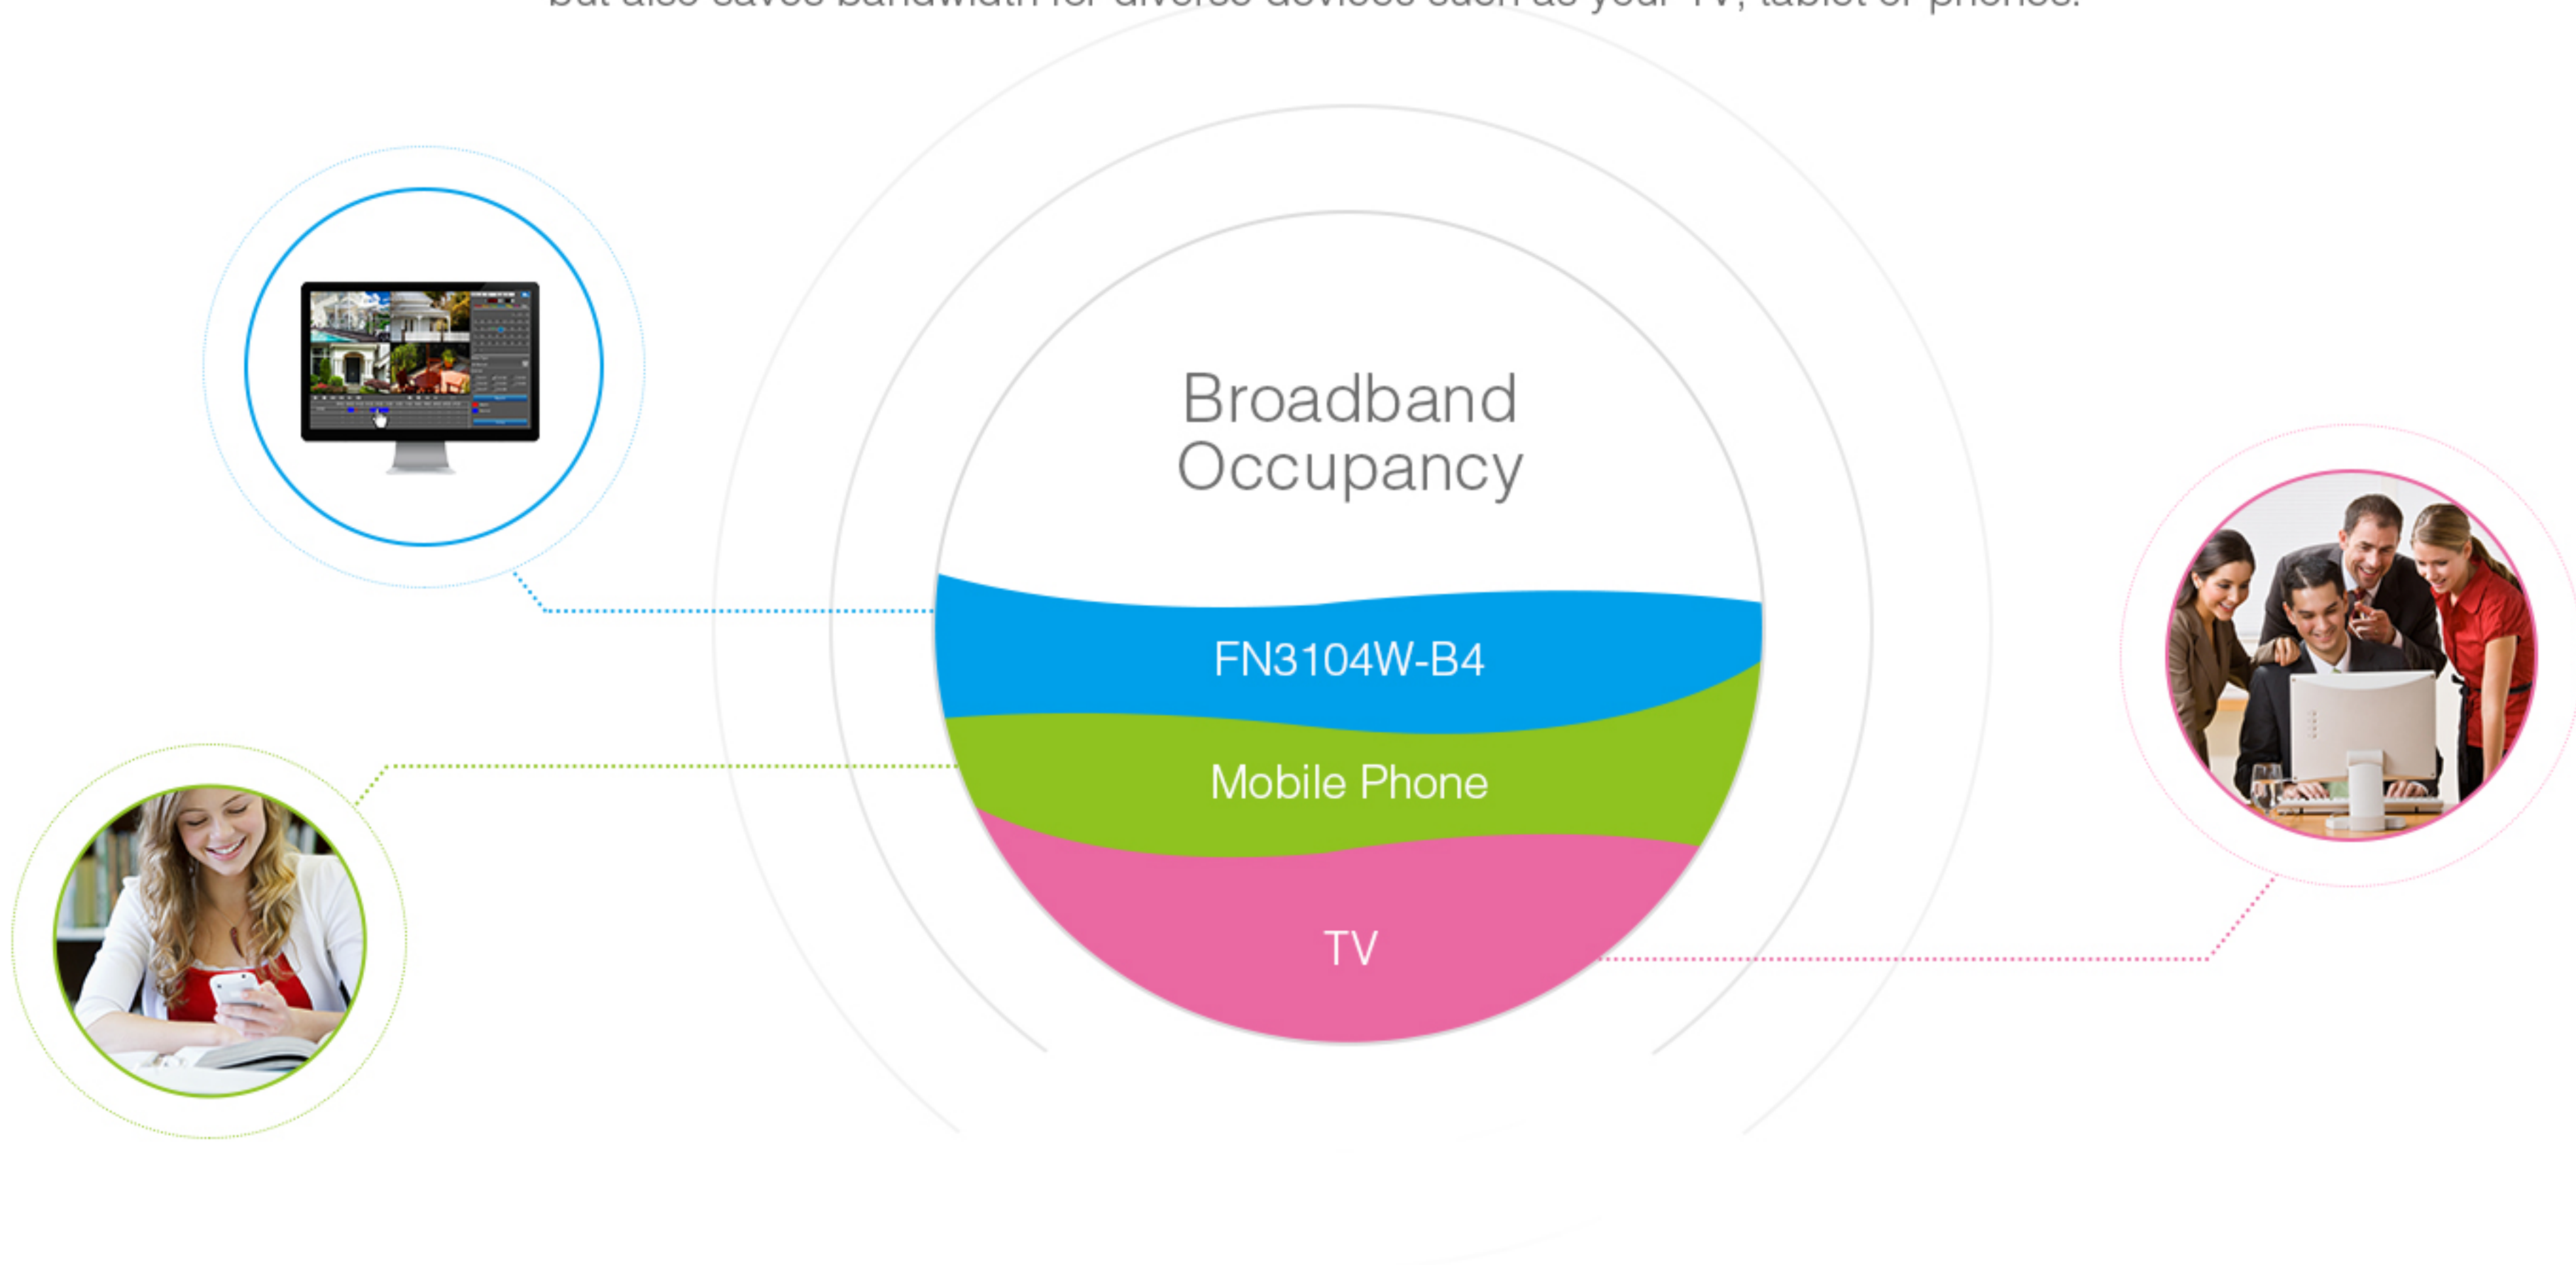

In open space up to
360 ft
(110 meters)

Tips: Please notice that the wireless signal distance is obtained in test environment without interference.

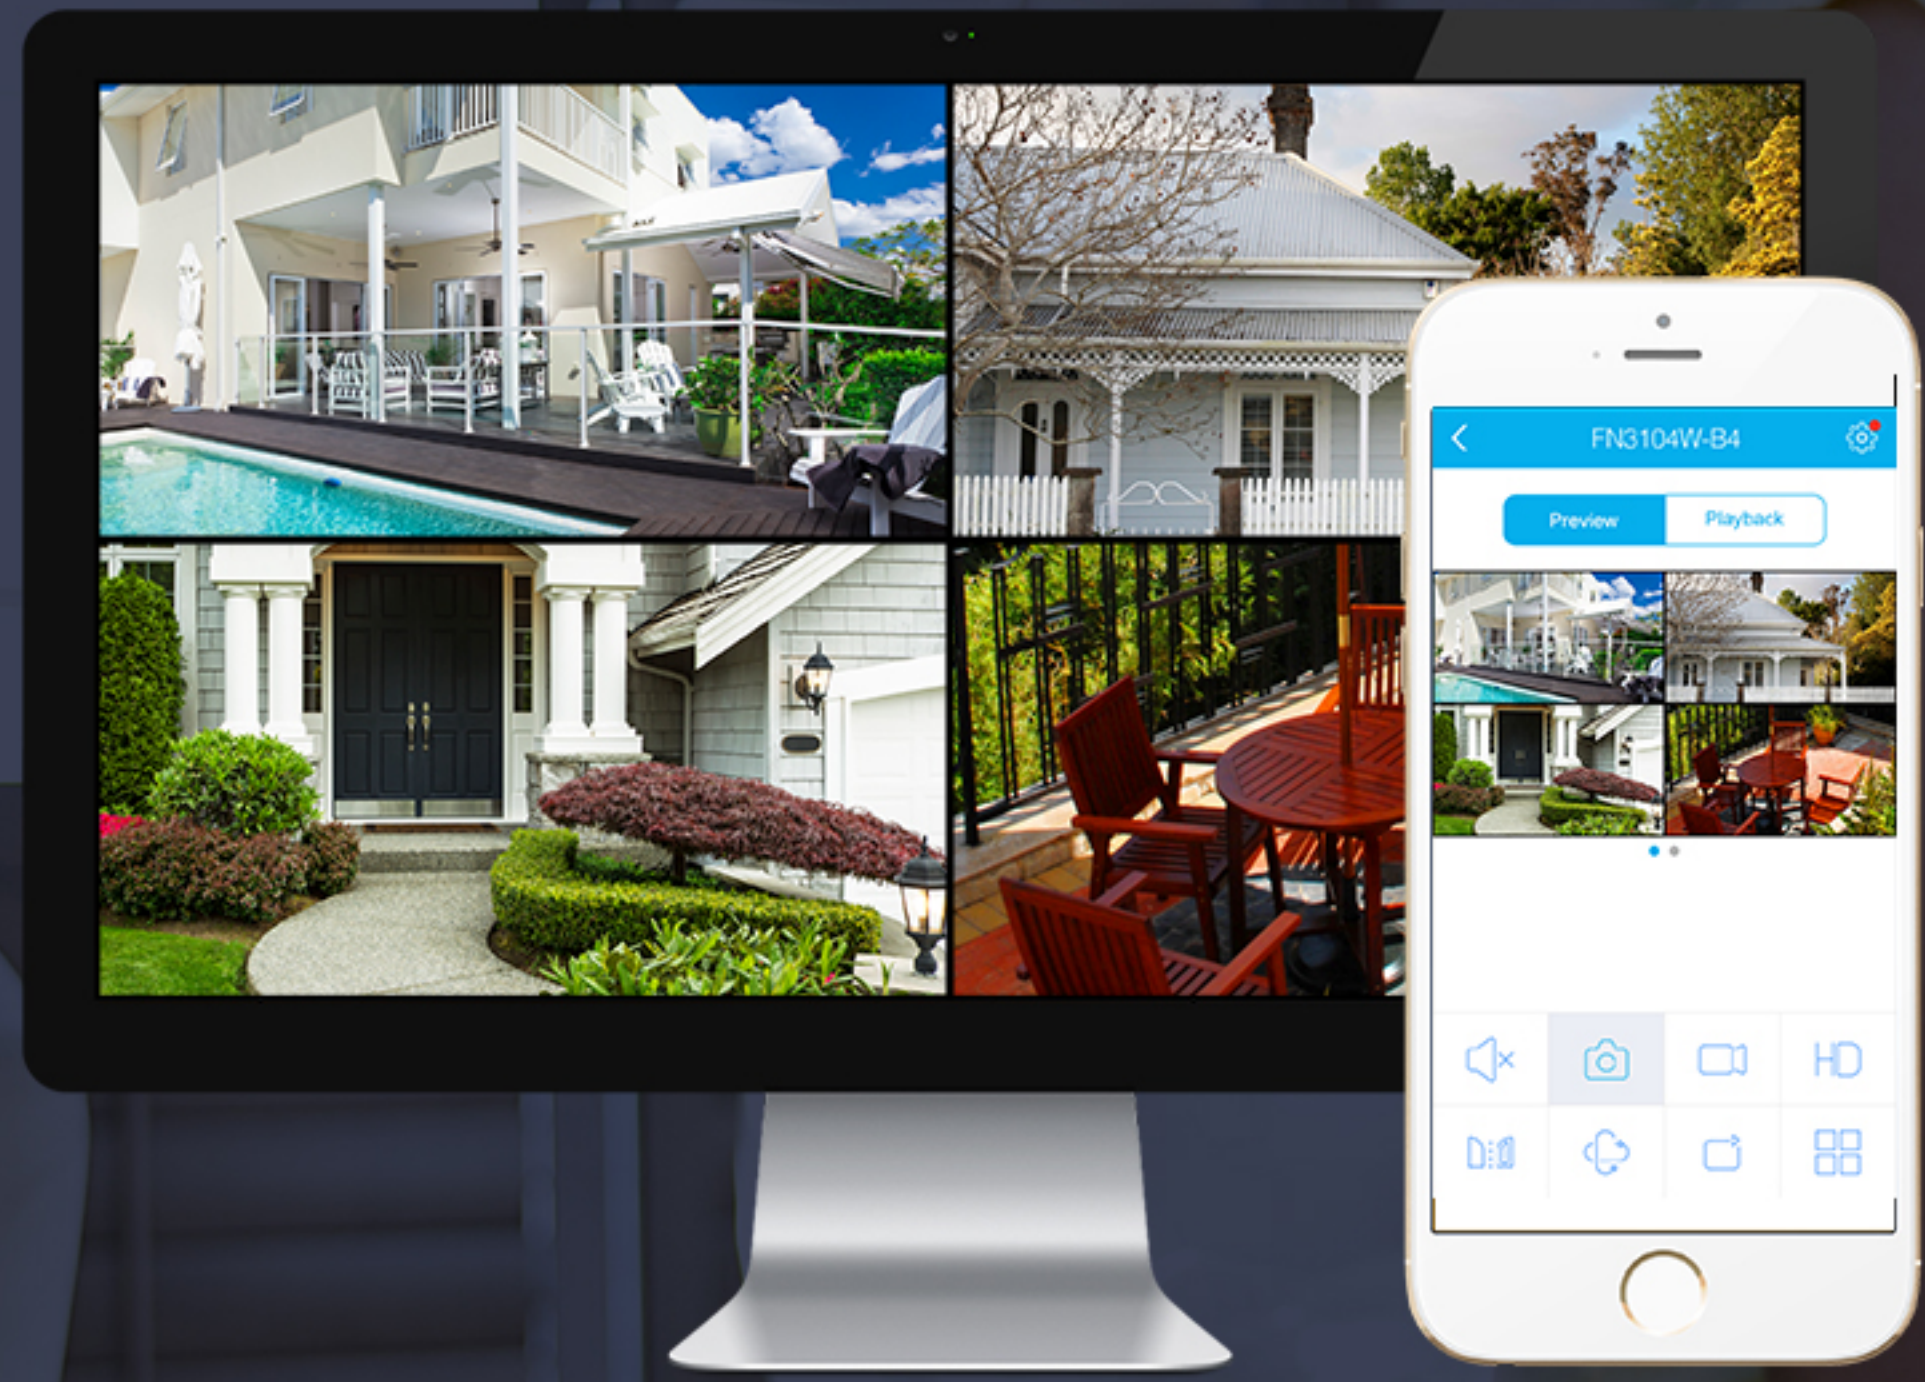

Bandwidth-friendly streaming for optimum viewing experience

Adaptive streaming technology not only enables the optimum streaming video viewing experience, but also saves bandwidth for diverse devices such as your TV, tablet or phones.

Multiple Access for Local and Remote Viewing

View and control your security system locally by connecting it to a monitor, or via major browsers such as IE, Firefox and Safari, or via iOS & Android App on mobile devices remotely.

APP
(iOS & Android)

1TB hard drive for 14-day video history

Wanna figure out what happened in the past? One 1TB hard drive is pre-installed for 24/7 recording and you can play back the video history within the past 14 days to make more confident judgments.

Clear night vision for 24/7 surveillance

30 IR-LEDs provide 66-feet (20-meter) IR range for you to see clearly in complete darkness. Around-the-clock guard helps deter the criminals under the cover of night and let you rest easy anywhere anytime.

IP66 rating to withstand severe weather conditions

IP66-rated housing is specially designed for camera to ensure protection against all types of bad weather. Year-round security monitoring never stops due to 14°F ~ 140°F operating temperature range.

Thermostable

Cold-resistant

Anti-dust

Water-resistant

System Connection

● Home

● Garage

● Store

● Supermarket

● Office

● Factory

Main Features

FN3104W-B4

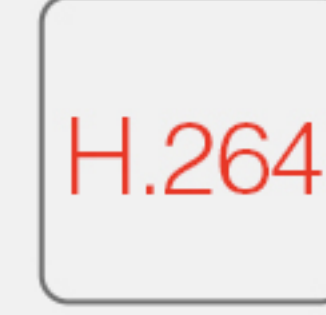

Wireless connection between NVR and camera

4-ch Synchronous Playback

Free Mobile APP

Advanced Video Compression

Pre-installed 1TB hard drive, up to 4TB

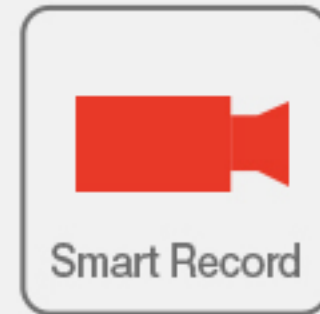

Data transfer to external storage device

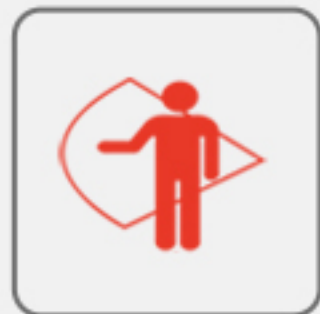

One-click firmware upgrade via mobile app

Plug and play for remote access via mobile app

Remove the redundant frames, extend video storage time

Motion detection alerts to email and FTP

IR range up to 66 feet (20 meters)

IP66 Weatherproof Design
