A New 1080P Bullet Camera With Sleek New Housing

Utilizing a mini design, the FI9900P exudes a high-end look and feel while providing lasting durability and quality. It's the perfect combination of technology and aesthetics.

The latest chipset from Ambarella is adopted, which grants high efficient compressing technology and excellent HD video processing capability. In the case of low bit rate it has better image quality than other chipsets.

Offer better image quality under the same bit rate

HD Resolution and Zoom for Perfect Clarity

The FI9900 provides a 2.0 MP lens which captures every detail. Moreover, new technology in the FI9900 allows you to use a zoom feature similar to optical zoom, but with a fixed-focus lens. That is to say, you can zoom in and out without decreasing the quality of the image.

Zoom=1X

Zoom=8X

Improved Infrared Technology for Better Night Vision

The FI9900P is equipped with 30 IR LEDs that can ensure a clear view, even in the dark. Clearer night vision offers you better reassurance in the case of a security threat.

No More Glare or Dark Spots with HDR (High-level WDR) Technology

No need to worry about dark faces under strong or heavy light. HDR automatically corrects lighting and gives you a more balanced image.
